

Listed are local traders whose names have been provided by members of Watch groups as being bona fide and reliable. **Please mention Home Watch when contacting Traders, and show your Membership Card to obtain any discount offered.** The list is provided for your assistance and the Watch cannot be held responsible for any work carried out by these traders that may fall below the standard that YOU expect. In all cases where you are intending to have work carried out which you think may cost £100-£200 or more, you should contact at least three companies or individuals with full details of the work you require to be carried out and obtain written specifications and quotations for the project. You should also satisfy yourself that any trader you use has the appropriate qualifications for electrical, gas, or any other work that requires specific qualifications. **You are advised against entering into contracts with itinerant traders calling on you and offering to do work cheaply.** There are many other good traders in the area who are not listed below and who may have given you good service in the past, in which case you would be advised to carry on using them.

*Please advise the Watch of any suggested additions to or deletions from this list (g@gpmcs.co.uk or 01202 884642). We obtain the trader's permission to appear in this list, so if you have recommended someone previously they may not appear if they have not given their consent. Some have too much work already, apparently!*
